Computer Systems & Information Technology

The CSIT Program prepares students for entry-level positions in the Information Technology (IT) field.

Students learn how to administer, support, and secure computer systems and networks through hands-on learning and case studies.

Students will install, configure, and diagnose hardware and software products. They will connect network devices and administer Local Area Networks (LAN).

Additionally, students will gain an understanding of cyber security practices.

The program prepares students for the A+, Network+, and Security+ CompTIA certification exams.
