A Magnet Program A MAGNET PROGRAM

Have You Heard...

Williams Middle Magnet School's focus on international studies prepares the whole child to truly become a citizen of the world by approaching relationships among cultures, nations, and societies in a global context.

The International Baccalaureate Middle Years Programme at Williams Middle Magnet focuses on student centered learning, service learning, global awareness, holistic learning and is academically rigorous. These core concepts coupled with an interdisciplinary focus provide access to a global learning community. Students learn to view the environment, the arts, history, science, and human interaction in a macrocosmic, larger-world sense.

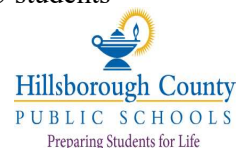

The total educational experience at Williams Middle Magnet School aims to increase students' self-awareness, promote a greater understanding of the students' connections and relationships with the world, and intertwine the threads of human experience.
