Automotive Maintenance & Light Repair Technician

The Maintenance and Light Repair Technician program prepares students for entry into Auto Maintenance Technician jobs. Students will learn the skills necessary to successfully perform the most common maintenance and light repair tasks. Students study safety, tools, equipment, shop operations, basic engine fundamentals, and basic technician skills. Students learn to diagnosis, service, and repair:

- electrical/electronic system components, battery, starting, charging, lighting, security, infotainment, and accessory systems
- front and rear suspensions systems, wheel alignment, and wheels and tires
- heating and air conditioning, refrigeration, heating, ventilation, and engine cooling, operating and related control systems.

The program prepares students for the ASE Auto Maintenance and Light Repair (G1) certification exam.
