Summer Learning Program Overview

Rationale

The Summer Learning Program (SLP) is designed to provide continuity of learning, strengthen core content understanding, and minimize the impact of learning loss over the summer. Research shows the following trends: achievement typically slows or declines over the summer months, declines tend to be steeper for math than for reading, and the extent of loss increases in the upper grades. In response, the Hillsborough Summer Learning Program (SLP) targets the following key areas of focus: elementary literacy and STEM, middle school grade enhancement, high school credit recovery, exceptional student education services, and enrichment opportunities.

Expected Outcomes

Students who participate in SLP will be better prepared for the next school year. This comprehensive PK-12 program will provide for continuity of learning, strengthen core content understanding, and minimize the impact of learning loss over the summer.

Eligible Students

SLP is for students who are currently enrolled in Hillsborough County Public Schools. Eligibility criteria is specific to each program and is included under the program descriptions (see section titled “Eligibility Criteria”).

Enrollment and Registration

The summer calendar begins June 4 and ends July 24, Monday through Thursday, except the week of July 4 which will be a three-day week (Monday, Tuesday, and Wednesday). Program locations and times are listed in this guide and may change based on enrollment and/or student needs. Eligible students will receive an SLP notification letter with specific program details including dates, times, and the assigned school.

Parents will be asked to confirm participation by responding directly to the school program contacts. Upon confirmation of participation, the student will be enrolled in the program by the school. Questions about registration and transportation should be directed to the student’s current school administrator.

Students with disabilities attending an ESE summer learning program will be assigned to a school by district staff based on the student’s summer address. The high school attendance boundary is used to determine the summer site for middle and high school ESE students. Parents will receive a letter confirming the assigned site and program details.

Migrant and English Learner Language Student Support

Migrant students and English language learners are provided additional support to meet the expectations of the program in which they are enrolled at specific sites as determined by need.

Related Staffing and Student Support Services

In order to provide an optimal learning environment, related staffing and services are provided as additional support to meet student needs and program expectations. This includes psychological services, school counselor services, social work services, health services, migrant and ELL instructional support, administrative staffing, instructional support staffing, student nutritional services, and transportation for eligible students within the core and required programs.

Transportation Services

Transportation services are provided for eligible students enrolled in elementary, middle school, and ESE programs that are required for academic benchmarks and/or promotion.

Student Nutritional Services

Breakfast and lunch are provided for all students enrolled in a summer program.

Employment Application Information

SLP positions will be posted on the HCPS Staff Hub beginning in April. The posting will include dates, locations, responsibilities, certification requirements and pay rates.

To apply for a summer position, applicants should complete the SLP Application online form and directly communicate with the program contact listed in this guide for any questions on the application process. The link to the form will be available on Staff Hub>District Offices>Human Resources>Summer Learning Program. The link may also be requested from a site administrator.

The principal, site administrator, or designee is responsible for hiring. The SLP administrator will communicate directly with applicants and complete personnel transactions for hired employees.
