

National Cyber Scholarship

FOUNDATION

Prey Patel was named Finalist by the National Cyber Scholarship Foundation

The National Cyber Scholarship Foundation (NCSF) is a national nonprofit whose mission is to identify, nurture and empower the next generation of cybersecurity experts; and eliminate the cybersecurity skills gap in the United States. Thousands of high school students nationwide participated to score points while solving a wide range of cybersecurity challenges through an exciting online cybersecurity training program sponsored by the NCSF. Top scorers in the program earned an invitation to participate in the Cyber Foundations Academy, valued at more than \$3,000, with bonus scholarships also up for grabs. Over 45,000 students nationwide sought to qualify for a National Cyber Scholarship (NCS), with just 5% meeting the requirements!

Our Qualifiers and Finalists

Congratulations to all our students who qualified for a National Cyber Scholarship and won their badges! We're so proud of your achievements and for representing Armwood High School. In particular, we would love to celebrate the achievements of the following student/s:

"I am very proud to be named a Finalist from the National Cyber Scholarship Foundation," said Patel. "I am thrilled to be invited to the Cyber Foundations Academy to continue my cybersecurity education."

We're so excited to hear about our student's experience at the Cyber Foundations Academy and where their cybersecurity skills take them next! If you are interested in competing in the competition next year, you can qualify by signing up and playing in CyberStart America – one of the qualification paths for the National Cyber Scholarship.
