

We have one of the most compelling virtual 20-minute sessions scheduled for this coming Tuesday, May 4th, from 6:30 pm EST - 6:50 pm EST with a teen that vaped thinking it was no big deal, and became the FIRST EVER double lung transplant recipient due to vaping.

This young man will join me on a Facebook LIVE! Session and we feel that your families and staff would like to know about this. Daniel's story and peer-to-peer message will move hundreds to make better life choices when it comes to vaping. You will be moved to tears and parents will learn the dangers of what many think is a better alternative to cigarettes and fairly harmless.

Could you share this link with all staff and families? [\(17\)](#)

I look forward to having you all join us Tuesday, May 4th, starting at 6:30 pm on our NOPE of Hillsborough Facebook Page. Thank you.
