

AP Statistics *Optional* Summer Assignment

Points available: 50 points

Due Date: August 31, 2025

This is an optional AP Statistics summer assignment – this is in **no way** mandatory but will help with some of the basic skills in AP Statistics and refresh skills you were to have learned in Algebra 1, Algebra 2 and middle school math.

1. Sign up for the Delta Math class: <https://www.deltamath.com/students?code=P99A-8B8X>

a. Make sure that your name on Delta Math is reflective of your name on Canvas.

2. Complete the Summer Assignment – there are 22 “skills” within the assignment. The skills range from converting a fraction to a decimal to basic probability rules.

a. To get credit for the assignment, you need to have a score of 75% or higher for each skill.

If you need me to reset them, or are struggling with the content, don’t hesitate to reach out!

3. Make sure you show all your thinking on a separate sheet of paper and send them to Mrs. Puskas on or before August 31, 2025.

a. If you could upload them as one PDF, that would be FANTASTIC.

As you’re working on the assignment, if you need assistance, send Mrs. Puskas a message at marie.puskas@hcps.net

Optional: Throughout the summer, I’ll be debriefing the skills you’ll need to know on the class’ Instagram Account (@puskas_apstat), so go ahead and follow the account if you have social media. Extra credit and other fun ways to review content will also be posted on this account throughout the school year!
