

# ALUMNI

*Spotlight*

**Program:**

Solar Photovoltaic System  
Design, Installation and  
Maintenance

**Current Employer:**

SolarEdge Technologies

**What are your career accomplishments?**

I was a service manager within 2 years, project manager after 3 years without having any prior experience. At the time in 2015, I installed one of the largest rooftops in the state of Florida. After 6 years at the company Erwin placed me at, I started working for the #1 manufacture for Solar inverters, SolarEdge. I worked my way up at SolarEdge and now I am one of the leading solar experts in the southeast region.

**What is one thing that future students should know about Erwin?**

Erwin really cares about their students. I witnessed that in most of the fields they offer. I made friends in various fields, and they all had help getting jobs through Erwin. Erwin really sets you for success without the crazy student loans from going to a traditional college.

**ADRIAN HERNANDEZ**
