

What is it?

• Inquiry based project that encourages the use of the scientific process to develop a solution to a **global problem**

• Students will:

- Develop an original idea based on a well researched real world problem
- Develop a research plan including designing an scientific investigation
- Keep a log book (folder) of their work and findings
- Carry out their scientific investigation
- Analyze their data
- Choose a product to share their findings

Why?

- Addresses Nature of Science State Standards
- Students develop a sense of global awareness and scientific understanding
- Experience how scientists think and act in real world situations
- Experience the IB design cycle

Potential Products

- App
- Working model
- STEM Fair Entry board (If project is competition worthy)
- Multi-media presentation
- Student choice with teacher approval

•Who?

- Motivated students who have CHOSEN to do a project.
- All students will be ASKED to come up with a testable question (the foundation of a project). They can then follow through if they choose.

Where?

- · At home; not at school
- Science teachers are available for consultation, project approval and follow up questions
- Proper planning ensures a smooth Thanksgiving break...

IB Criteria

Criterion A: Inquiring and analyzing

- explain and justify the need for a solution to a problem state and prioritize the main points of research needed to develop a solution to the problem present the main findings of relevant research.

Criterion B: Developing ideas

- develop a list of success criteria for the solution
- present feasible design ideas, which can be correctly interpreted by others
- present the chosen design create a planning drawing/diagram which outlines the main details for making the chosen solution.

· Criterion C: Creating a solution

- outline a plan, which considers the use of resources and time, sufficient for peers to be able to follow to create the solution
- demonstrate excellent technical skills when making the solution
- follow the plan to create the solution, which functions as intended list the changes made to the chosen design and plan when making the solution
- present the solution as a whole.

Criterion D: Evaluating

- outline simple, relevant testing methods, which generate data, to measure the success of the solution
- outline the success of the solution against the design specification
- outline how the solution could be improved
- outline the impact of the solution on the client/target audience.

Important Points

- Needs to be an original project
- No pairs or groups
- Needs to address a real world problem
- Needs to be able to collect qualitative or quantitative data
- Materials for project are accessible
- NO chemicals, bacteria, bodily fluids, mold
- humans (psychologist required) or vertebrate animals (veterinarian required)
- You MAY NOT copy an experiment from the internet or from previous years. It will not be accepted.

When will my child get help?

- Email/Canvas
 - primary form of communication
 - Project pieces will be submitted via Canvas
 - Specific after school days TBA

NOTE: Checkpoints will be given to students to keep on track

FINAL PROJECT DUE DECEMBER 2nd

zfairs

- Hillsborough requires students to register at hillsborough.zfairs.com
- You must register once your child's topic has been approved their teacher
 - All fields can be edited later if needed
- Paperwork cannot be completed until the research plan has been uploaded and approved by the district
 - Note: Adult sponsor is your child's teacher
 - Research plan template available if needed
- Final project and paperwork approval comes through zfairs

 ALL OF THIS MUST BE DONE PRIOR TO EXPERIMENTATION

What will be needed?

- Two pocket three prong folder
- Looseleaf paper
- Access to a Color Printer
 - All documents must be typed (exception: Log is hand written)
 - Graphs need to be computer generated and in color
- Access to computer program(s) that can create graphs, charts, and data tables

When is STEM Fair?

- PROJECT DUE by December 2, 2021
- School Wide: December 3-5, 2016
- Regional: February (TBA) at the Tampa Convention Center
- States: TBA
