

2020-21
Semester 1
Schedule of Live
Shows & Topics

Date	Topic
9/10/20	Proportional Reasoning Using tables, graphs and equations to determine proportionality and solve problems
9/17/20	Pythagorean Theorem Proving, applying, its converse
9/24/20	Operations with Rational Numbers Models, algorithms and applications
10/1/20	Applying Percent Rate of change, sales tax, discount, interest, markup, markdown
10/8/20	Simplifying Expressions & Properties of Numbers Applying commutative, associative and distributive properties
10/15/20	Linear Functions Graphing, writing, applying and explaining linear equations
10/22/20	Solving Equations with Rational Numbers One-step, two-step and multi-step
10/29/20	Ratios and Rates Including tables, graphs, and circumference
11/5/20	Powers and Exponents Rules of exponents, square and cube roots, simplifying roots
12/3/20	Relationships with 2 Variables Use independent, dependent variables from real-world problems in tables, equations and graphs
12/10/20	Semester Review

📞 Call in during live shows 5:30 – 7 p.m.
