

Help students achieve mental wellness with Hazel Health

Hazel Health partners with school districts to provide students with access to timely virtual mental health care, at no cost to families.

The largest and most trusted **telehealth solution** for K-12 schools

Licensed therapists help students cope with their feelings, **regardless of insurance status, immigration status, or ability to pay**

Virtual therapy sessions

Therapy at school

Therapy at home

When a student has a therapy appointment, they connect with their Hazel therapist at school or at home.

How students access therapy

- 1 Referral from school staff or guardian
- 2 Intake session (first session)
- 3 Ongoing therapy sessions
- 4 Discharge or connection to longer-term care

Common mental health concerns

Diverse therapists who mirror the communities Hazel serves

Our care team speaks multiple languages, is understanding of cultural differences, and are experts in the unique needs of children and teens.

“We’ve seen a dramatic increase, especially, with the need for coping skills, for things like anxiety, anger, sadness, and also just those basic social, emotional skills we’re seeing a need for. And that’s really where Hazel Health has come in to help support us to meet that need.”

Aurora Public Schools

Hazel Health by the Numbers

Eight million students are chronically absent from school each year and over half are not connected to a medical home. Sixteen percent of children live below the poverty line, and half are insured under Medicaid or CHIP.

20% of all children in the United States have a mental health disorder, but only 1 in 5 receive care. 44% of high school youth feel persistently sad or hopeless.

Hazel aims to address the youth mental health crisis and improve academic outcomes by confronting access gaps that fuel health inequities.

Impact on mental health outcomes

71% of guardians say their child's relationship with family and friends has improved since starting therapy

48 hours average amount of time it takes Hazel to schedule first appointment

29% of visits result in a referral to long-term counseling or psychiatry

68% of guardians say their child looks forward to school more since starting therapy

Addressing social determinants of health and health equity

86% of families report that a Hazel visit reduces missed work or child care time

100+ schools in rural areas that may lack broadband access use Hazel
