

This accelerated math program is completely voluntary. Students who apply for this opportunity must be self-motivated, seek an additional challenge in math, and be willing to take on the additional rigorous course work. You will need to have access to a computer and the internet to take the course. You will also be communicating by phone on a regular basis with the course instructor. The responsibility of successful online course completion will be placed on the student and parent. Successful completion of the course and the 7th grade math FSA, will allow your student to be placed in Algebra 1 Honors as a 7th grader during the next school year.
